## Cautious Growth

(Average Chelsea Risk Rating 3.66)\*  
Application form on page 21

Cautious Growth is for those who feel uncomfortable with a higher level of risk. This aims to provide a steady level of growth with limited volatility. Approximately one third of the portfolio is in corporate bonds, which lowers the exposure to equities and thus stock-market volatility. A large proportion of your investment will be in the UK, thereby reducing any fluctuations in foreign markets and there is a bias towards large-cap stocks, which tend to be less volatile.

## Balanced Growth

(Average Chelsea Risk Rating 5.00)\*  
Application form on page 21

This offers you a medium level of risk. It gives broader exposure to developed foreign markets to provide diversification outside the UK and has a slightly more aggressive UK stance, with exposure to smaller companies. This is balanced with lower risk corporate bond and equity income holdings. With almost 60% in the UK, foreign exposure is limited to approximately 16% in the US and 16% in Europe.

## Aggressive Growth

(Average Chelsea Risk Rating 7.08)\*  
Application form on page 21

If you have a sufficiently long time horizon and feel comfortable with a certain amount of risk, you may wish to choose Aggressive Growth. This encompasses a greater degree of volatility with the prospect of higher long-term growth. It offers a broad-based portfolio, with global exposure enabling you to take advantage of any upturn in markets worldwide. It combines large, medium and small-cap companies.

## Income

(Average Chelsea Risk Rating 2.83)\*  
Application form on page 21

If your priority is income, the Chelsea Easy ISA Income option could suit your requirements. A combination of corporate bond and equity income funds provides a regular income with an element of capital appreciation. This should enable you to maintain the real value of both your capital and income. **The average yield for this portfolio is 5.52%†.**
